Well, thanks brfransen for a quick update. It was a wise move to put mpd 0.19.15 in extra-testing repository, since this version fails also... This time mpd complains about libavformat.so.57 missing. Looking at https://www.musicpd.org, the latest update moved to using ffmpeg 3.0. So I _guess_ 0.19.14 could be a compatible mpd -version.

$ mpd
mpd: error while loading shared libraries: libavformat.so.57: cannot open shared object file: No such file or directory

- Target version set to 8.4

- Category set to Packages: Extra

You need to install ffmpeg 3.0 which is also in testing. But since there are so many deps that go into ffmpeg and mpd it is best to switch to the testing repos and update.
