

LinHES - Feature # 1017: Modify LinHES theme to show season/episode number in recordings screen

Status:	Closed	Priority:	Normal
Author:	Heilig	Category:	Packages: Core
Created:	10/21/2017	Assignee:	brfransen
Updated:	10/30/2017	Due date:	
Description:	<p>I want to propose a modification to the excellent LinHES theme:</p> <p>In the recordings view, it would be nice to see the season/episode number for shows in the list (instead of in details view only), so it is possible to quickly scan available episodes.</p> <p>I created a patch to show season/episode number instead of the recording date (which personally I am not that much interested in).</p> <p>For shows where season/episode are available, they are displayed in place of the recording date, otherwise the recording date is displayed.</p> <p>The patch to display season/episode number is here:</p> <pre><pre>diff -Nur LinHES/recordings-ui.xml LinHES-new/recordings-ui.xml --- LinHES/recordings-ui.xml 2017-10-21 13:23:43.000000000 +0200 +++ LinHES-new/recordings-ui.xml 2017-10-21 14:49:40.000000000 +0200 @@ -209,8 +209,12 @@ <area>8,0,694,30</area> basesmallverylightgrey </textarea> - <textarea name="shortstartdate" from="titlesubtitle"> - <area>720,0,80,30</area> + <textarea name="00x00" from="titlesubtitle"> + <area>720,0,90,30</area> + <align>right,vcenter</align> + </textarea> + <textarea name="shortstartdate" from="titlesubtitle" depends="!00x00"> + <area>720,0,90,30</area> + <align>right,vcenter</align> + </textarea> + <textarea name="filesize_str" from="base_text_font_state_extrasmall"> @@ -228,8 +232,12 @@ basesmallyellow <align>vcenter</align> </textarea> - <textarea name="shortstartdate" from="titlesubtitle"> - <area>720,2,80,24</area> + <textarea name="00x00" from="titlesubtitle"> + <area>720,2,90,24</area> + <align>right,vcenter</align> + </textarea> + <textarea name="shortstartdate" from="titlesubtitle" depends="!00x00"> + <area>720,2,90,24</area> + <align>right,vcenter</align> + </textarea> + <textarea name="filesize_str" from="base_text_font_state_extrasmall"> </pre></pre>

Thanks for the request.

I greatly prefer the short recording date for the selection list as it is always available. For consistency, I avoid changing data fields like this unless there is a clear context change.
