Description:	I am new to linHES. Had a previous system that had a working MythTV/Kodi using the USB-UIRT transmitter to change the channels of a TELUS stb. USB-UIRT is missing from remotes. Of I cannot find my old setup for this. TELUS is not in the list of boxes for transmitting. My uploaded file is general.conf.

I forgot to mention I never did get the USB-UIRT to work in Linux along side the MCE receiver. I had to have a VM of Win 7 running Eventghost with a webpage of buttons to actually sent commands to actually press the buttons from Linux MythTV.
