LinHES - Bug # 1028: Stopping Chrome

Status:	Closed	**Priority:**	Normal
Author:	jastreet	**Category:**	
Created:	10/24/2018	**Assignee:**	
Updated:	10/25/2018	**Due date:**	
Description:	The latest update of Chrome seems to no longer respond to cntrl-w (stop) on my remote. When pressed I get a pop-up to press Alt-f (or some key, I forgot) + x to stop chrome. After pressing that key combo, the front end does a complete restart. I prefered the previous control-w, anyway to bring that back?

Chome depreciated Ctrl+Shift+q which LH used in wol-lircrc. Ctrl+Shift+w and Ctrl+w still work for me. Double check you lircrc files to make sure they are not using Ctrl+Shift+q.

Alt+f is LH defined to restart the frontend.

You are correct, it appears I need to reinstall my lircrc files. Thanks for the tip.
