

LinHES - Bug # 167: Keyboard Unresponsive After Manually Starting X

Status:	Closed	Priority:	Normal
Author:	mihanson	Category:	
Created:	01/27/2009	Assignee:	cecil
Updated:	03/20/2010	Due date:	
Description:	On a "masterbackend" configuration, when I try "startx" on the commandline (as user mythv or root), the keyboard becomes unresponsive until I issue a "pkill xinit" from an ssh session. Logs & xorg.conf attached.
