LinHES - Bug # 227: Mythweb/Mythvideo errors

Status:	Closed	**Priority:**	Normal
Author:	mihanson	**Category:**	
Created:	02/26/2009	**Assignee:**	jams
Updated:	12/25/2011	**Due date:**	12/31/1969
Description:	When I click on the MythVideo icon in MythWeb, I'm greeted by a page of errors like this one: <code>Error at /data/srv/httpd/htdocs/mythweb/objects/Video.php, line 56: Division by zero</code> I think we've seen this before, but I forget what the fix was. Something in the php5 package maybe?

I can confirm a different error with mine, I get:

<code>Could not create a symlink to /myth/video, the local MythVideo directory for this hostname (mythtv). Please create a symlink to your MythVideo directory at data/video in order to use the video portions of MythWeb.
</code>

I believe this is an error in the original myth script and is not LinHES.

To fix this, I added an if check to verify the width and height were legal (ie. there is an image).
    if (($width != 0) && ($height != 0)) {

so the code block looks like:
<code>
    if (($width != 0) && ($height != 0)) {
      $wscale = video_img_width / $width;
      $hscale = video_img_height / $height;
      $scale = $wscale < $hscale ? $wscale : $hscale;
      $this->cover_scaled_width = floor($width * $scale);
      $this->cover_scaled_height = floor($height * $scale);
    }
</code>

06/15/2009 04:06 pm - jams

division by zero error fixed upstream.
symlink error has been fixed in mythweb-0.21-18
