

LinHES - Bug # 265: R6 Preview Release Missing CommandIR Support

Status:	Closed	Priority:	Normal
Author:	strick1226	Category:	
Created:	03/07/2009	Assignee:	jams
Updated:	12/25/2011	Due date:	12/31/1969
Description:	No option to configure CommandIR, CommandIR Mini, or CommandIR II in R6.00.07. Would be great to have scripts included to configure these devices for those with multiple set-top boxes.

If the blaster is set for commandir, then it also will be the receiver. All other receivers are disabled, including LCD's that interact via lirc.
It's still up to the user to setup the change channel scripts.
