LinHES - Bug # 294: Support for mythnuv2mkv

Status:	Closed		**Priority:**	Normal
Author:	mihanson		**Category:**	
Created:	03/16/2009		**Assignee:**	jams
Updated:	12/25/2011		**Due date:**	12/31/1969
Description:	I'd like to see support for [[http://web.aanet.com.au/~auric/?q=node/6|mythnuv2mkv]]. This is a bash script, but it's has some dependencies that LinHES does not seem to have. [[http://www.bunkus.org/videotools/mkvtoolnix/|mkvtoolnix]], [[http://www.vorbis.com/|vorbis-tools]], [[http://gpac.sourceforge.net/feat.php|MP4Box]] Not sure if the LinHES' libvorbis is the same thing as the vorbis-tools or not.			

History

Does myth2x264 (in /usr/LH/bin) not fit the build?

03/22/2009 07:28 pm - mihanson

myth2x264 creates an avi, which is ok, but mythnuv2mkv can create avi, mp4 or mkv. It can do more. BTW, my install does not have myth2x264 in /usr/LH/bin.
