

LinHES - Bug # 318: Delay in Executing Remote Control Commands

Status:	Closed	Priority:	Normal
Author:	mihanson	Category:	
Created:	04/08/2009	Assignee:	jams
Updated:	12/25/2011	Due date:	12/31/1969
Description:	I'm running mythtv-udpau and I semi-frequently experience mythtv delays executing remote control button presses, as described [[http://www.gossamer-threads.com/lists/engine?do=post_view_flat;post=347546;page=1;sb=post_latest_reply;so=ASC;mh=25;list=mythtv here]]. This problem does not seem to be unique to the mythtv-udpau build, so I'm reporting it here. It seems that a patched mpeg.c file solves the problem for several people in the aforementioned thread. I was hoping we could add [[http://svn.mythtv.org/trac/ticket/6406][this patch]] to our mythtv builds until the mythtv devs either find a better solution or accept this patch.		

History

04/10/2009 05:58 pm - jams

patch applied to mythtv rev 59 and the community pkg rev 12
please try it out and report back.

04/27/2009 06:14 pm - mihanson

This seems to be working. I still seem to have some navigation delays when moving from an ATSC to SD cable recording on the watch recordings screen, but overall, I'd say things have improved remarkably.
