LinHES - Bug # 329: lirc drivers

Status:	Closed	Priority:	Normal
Author:	kc8vfa	Category:	
Created:	04/18/2009	Assignee:	cecil
Updated:	12/25/2011	Due date:	12/31/1969

Description:	Lirc has a lot of drivers in it from source..... why arn't the same drivers avail from linhes/knoppmyth..... ie: iguanaIR. i for one am not a coder by anymeans and have wiped my system many times trying to remove lirc and recompile from source and install just so i can get lirc to use hardware that it supports out of box, can all the drivers supported be included please?
	Thanks for the time and effort in keeping this project goin. i would be happy to help in anyway i can.

LIRC is compiled with --drivers=all so, all drivers should be built with the expection of || and another (I forget as it is broken). If there is a specific driver that is missing, we need specific details. I'll look into the iguanaIR, any link you can provide would be helpful.

iguanaIR has been implemented and tested successfully by James.

sudo pacman -Sy lirc iguanaIR
