

LinHES - Bug # 361: pvr150 remote stops working after update of 6.00.08

Status:	Closed	Priority:	Normal
Author:	craigtv	Category:	
Created:	05/25/2009	Assignee:	jams
Updated:	12/25/2011	Due date:	12/31/1969
Description:	My pvr150 remote worked after the initial installation of 6.00.08, however, after a pacman Syu update it stopped working. /var/log/lircd contains the following (may times): <code> May 24 17:57:46 mythtv lircd: accepted new client on /dev/lircd May 24 17:57:57 mythtv lircd: caught signal May 24 17:58:01 mythtv lircd: lircd(default) ready May 24 17:58:02 mythtv lircd: closing logfile May 24 17:58:02 mythtv lircd: reopened logfile May 24 20:01:14 mythtv lircd: accepted new client on /dev/lircd May 24 20:01:14 mythtv lircd: could not get file information for /dev/lirc0 May 24 20:01:14 mythtv lircd: default_init(): No such file or directory </code>

I have the Pinnacle USB MCE2 remote that also stopped working with this release. lircd has the same errors.

There is a bug in the configuration script. James is in the process of rewriting the script in Python. Quick fix would be to add "[startup] {sudo modprobe lirc_pvr150}" in ~/.fluxbox/apps before LinHES-run.

The quick fix works for me. Thanks!!

Will I need to take that back out of the apps file when the official fix comes out?

06/08/2009 07:17 pm - uteck

Latest update on 8 June fixed it for me.

Thanks for the fix.

06/08/2009 10:09 pm - cecil

@craigtv: You shouldn't have to as it will just error. That being said, to fix:

delete the startup line

sudo -Syu

sudo reboot

After rebooting, setup your remote again.
