

LinHES - Bug # 365: Upgrade mkvtoolnix for bug fixes and new features (MLP/TrueHD audio)

Status:	Closed	Priority:	Normal
Author:	mihanson	Category:	
Created:	05/27/2009	Assignee:	cecil
Updated:	12/25/2011	Due date:	12/31/1969
Description:	When possible, can you upgrade mkvtoolnix to the latest version 2.9.0 as of this moment. It adds support for MLP audio which I could use. ;) [[http://www.archlinux.org/packages/extra/i686/mkvtoolnix/ Arch Link]]

A bug in the 2.9 release kills a feature I wanted to take advantage of. Conacted the author and he thinks he has it fixed in git. Can we try this again using the git repo? <http://www.bunkus.org/videotools/mkvtoolnix/source.html>

06/02/2009 01:44 pm - mihanson

Hold off on compiling from git. I compiled from git locally and the bug still persists. I'll let you know when the issue is resolved.

06/06/2009 05:14 pm - mihanson

Ok, the most recent git of mkvtoolnix fixes my bug. Please create a new pkg against the git whenever you have a chance.

06/09/2009 03:54 pm - mihanson

A bug fix release of mkvtoolnix was released on June 6 that includes my bug fix. Version is 2.9.5. Should be a straight forward recompile now with no need for git.
