

## LinHES - Bug # 468: build process: directory conflicts

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	Human	<b>Category:</b>	
<b>Created:</b>	08/03/2009	<b>Assignee:</b>	
<b>Updated:</b>	03/21/2010	<b>Due date:</b>	
<b>Description:</b>	<p>Not sure if this is happening due to pacman or due to PKGBUILD flags, but I have on several occasions run into dependent packages that will not install because /usr/info/dir already exists. For the moment, I've been forcing pacman to ignore these conflicts (pacman -Uf [pkg_file]), but this may just defer the problem for later.</p> <p>Example of conflict:</p> <pre>[root@LinHES_build linhes-scripts]#mpl -s ----- ==&gt; Making package: linhes-scripts 1-18 i686 (Mon Aug  3 18:16:48 UTC 2009) ==&gt; WARNING: Running makepkg as root... ==&gt; Checking Runtime Dependencies... ==&gt; Installing missing dependencies... resolving dependencies... looking for inter-conflicts... ### History

08/20/2009 07:10 pm - harveythedog

I seem to be having the same problem [[<http://mysettopbox.tv/phpBB2/viewtopic.php?t=20249>][here]]

error: could not prepare transaction

error: failed to commit transaction (conflicting files)

/usr/info/dir exists in both 'fftw2' and 'glib'

/usr/info/dir exists in both 'fftw2' and 'gtk'

/usr/info/dir exists in both 'glib' and 'gtk'

Errors occurred, no packages were upgraded.

**08/20/2009 07:56 pm - jams**

There is a little bug with makepkg causing this to happen. Add ldocs and lempydirs to your makepkg.conf, or to the local pkgbuild.

The three pkg's mentioned specifically here have been fixed.

*- Status changed from New to Closed*

seems to be ok now. Any new pkgs found will we dealt with when they pop up
