Status:	Closed	Priority:	Normal

Updated:	08/15/2009	Due date:	
Description:	zoneminder 1.23.3-6 does not work because it was compiled against libfaad.so.1 while LinHes 6.00.08 ships with libfaad.so.2. See: http://mysettopbox.tv/phpBB2/viewtopic.php?t=20145 One solution is to rollback to 1.23.3-5.

who keeps building against libfaad.so.1? I think we need to add pacman -Syu to the start of mp to prevent this from happening.

I recompiled and pushed this package (no changes), however I don't use zoneminder so I can't test. On the forum "azrambler" is testing.
