

LinHES - Bug # 509: Thumbnail Generator (screenshot.sh) exits when more than one directory defined for MythVideo

Status:	Closed	Priority:	Normal
Author:	djb61230	Category:	
Created:	08/16/2009	Assignee:	cecil
Updated:	03/20/2010	Due date:	12/31/1969
Description:	<p>The script that is called by the Thumbnail generator named /usr/LH/bin/screenshot.sh will exit when more than one directory path is defined in MythVideo. In MythVideo more than one directory can be defined by colon ":" separating each path. The screenshot.sh script assumes there is just one path.</p> <p>Here is a proposed solution (diff):</p> <pre>90,94c90,99 < if [! -d "\$VIDEO_HOME"] ; then < echo "Directory \$VIDEO_HOME does not exist, nowhere to put the screen shot!" < echo "Have you configured MythVideo yet?" < exit 1 < fi --- > VIDEO_HOME=\${VIDEO_HOME//:/ }; > VIDEO_HOME_COUNT=\${#VIDEO_HOME[@]} > for ((i=0; i<\${VIDEO_HOME_COUNT}; i++)); > do > if [! -d "\${VIDEO_HOME[\$i]}"] ; then > echo "Directory \${VIDEO_HOME[\$i]} does not exist, nowhere to put the screen shot!" > echo "Have you configured MythVideo yet?" > exit 1 > fi > done</pre> <p>Attached is a file reflecting this change.</p>
