LinHES - Bug # 511: zoneminder will not start because of libavutil

Status:	Closed		Priority:	High
Author:	bobmyth		Category:	
Created:	08/16/2009		Assignee:	cecil
Updated:	03/20/2010		Due date:	12/31/1969
Description:	zoneminder is compiled to use wrong version of libavutil. I installed using R6.00.09:			

/usr/lib/zm/bin/zmfix

/usr/lib/zm/bin/zmfix: error while loading shared libraries: libavutil.so.49: cannot open shared object file: No such file or directory

updatedb && locate libavutil

/usr/lib/libavutil.so.50

/usr/lib/libavutil.so.50.3.0

pacman -Qo /usr/lib/libavutil.so.50.3.0

/usr/lib/libavutil.so.50.3.0 is owned by ffmpeg-svn 19483-1

Probably need to recompile zoneminder unless another version of ffmpeg is available that uses the older libavutil.
