

LinHES - Bug # 522: add *.php pattern to MythVideo blacklist

Status:	Closed	Priority:	Low
Author:	Human	Category:	
Created:	08/25/2009	Assignee:	jams
Updated:	03/21/2010	Due date:	
Description:	The php files for myth2xvid and myth2ipod that live in /myth/video and /myth/video/archive are seen by MythVideo as possible video files. This means that they show up when the user browses videos or runs the video manager. The screenshooter also tries to take screenshots for them. I can add the pattern to twk_general.pl, and I'll see if I can add it for upgrades, too.		

History

08/25/2009 11:20 am - Human

Pattern added to twk_general.pl. Untested, but the change was trivial. This will only affect fresh installs.
