Updated:	03/22/2010	Due date:	
Description:	It would be nice for the user to have firewire_tester, 6200ch, red_eye and sa3250ch already pre-compiled and installed in /usr/bin (or somewhere else in the \$PATH). The necessary files already exist under the /usr/share/mythtv/contrib and /usr/share/mythtv/contrib/channel_changers. They just need to be compiled. All necessary info for compiling are in the the associated README's. firewire_tester instructions are actually [[http://www.mythtv.org/wiki/FireWire#firewire_tester]].

Add directv script here as well. <http://www.pdp8.net/directv/directv.shtml>

03/22/2010 04:10 pm - christian

You may also wish to include:

<https://code.google.com/p/sa3250cmd/>

This allows users to to power on/off and check power status of their STB. It is standard so will work on most STBs not just SA ones. I also included channel change scripts that use it.

C

03/22/2010 07:20 pm - mihanson

- Target version set to 6.03.00

- Status changed from New to Closed

03/22/2010 07:20 pm - mihanson

- % Done changed from 0 to 100

Did not include everything. Only what I thought may be useful to some.
