

LinHES - Bug # 536: system shutdown VERY slow (NFS mounts)

Status:	Closed	Priority:	Normal
Author:	graysky	Category:	
Created:	09/06/2009	Assignee:	jams
Updated:	03/20/2010	Due date:	
Description:	<p>My FE system pauses for approx 2 min when it shuts down. The problem seems to unmounting NFS shares which I setup through the service menu (simply my /myth/video exported from my MBE).</p> <p>From my MBE (R5.5): /etc/exports <code>/myth/video 192.168.1.2(rw)</code></p> <p>From my FE (R6) which was entirely auto generated: /etc/fstab <code>192.168.1.3:/myth/video /myth/video nfs</code></p> <p>When manually configuring my FE box on R5.5, the nfs line in /etc/fstab would be bigger, e.g.:</p> <p><code>192.168.1.3:/myth/video /myth/video nfs defaults,auto,noatime 0 0</code></p> <p>Could this explain the</p>

were any updates applied to the base install?

09/06/2009 11:27 am - graysky

@jams - Yes, I ran an update via pacman so this box is current. I didn't attempt to enable nfs prior to the update.

I reported this issue in bug #472. I noticed that that the system seemed to be shutting down the network services, then trying to unmount network drives.

Somehow the code to stop this from happening was dropped on the last release. It's been readded.
