

## LinHES - Bug # 586: Motherboard temperature doesn't display in RRDTool. rrd\_mbtemp.pl is not R6 compatible.

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	rsay	<b>Category:</b>	
<b>Created:</b>	11/28/2009	<b>Assignee:</b>	jams
<b>Updated:</b>	03/25/2010	<b>Due date:</b>	
<b>Description:</b>	<p>I noticed that Motherboard temperatures were not displaying in RRDTool. When I did get them to display, the graphs were not attractive and didn't match the rest of the graphs on the page.</p> <p>I made the following changes in my system:</p> <ol style="list-style-type: none"><li>1. Made rrd_mbtemp.pl executable</li><li>2. Redefined the location of the RRD and Web files in rrd_mbtemp.pl for R6</li><li>3. Changed the size and background colors of the graphs to match the others on the RRDTool page.</li><li>4. Added a colored temperature gradient below the plotted temperature line and reworded the graph labels for improved clarity.</li><li>5. Updated /data/srv/httpd/htdocs/rrd/index-rrd.html to include display of MB temperatures.</li><li>6. Added mbtemp to the /usr/bin/run_rrd.sh script.</li></ol> <p>To maintain a consistent look, I made similar changes in rrd_hddtemp.pl</p> <ol style="list-style-type: none"><li>1. Changed the size and background colors of the graphs to match the others on the RRDTool page.</li><li>2. Added a colored temperature gradient below the plotted temperature line and reworded the graph labels for improved clarity.</li></ol>
