

LinHES - Bug # 633: use 'svn export' instead of 'svn co' in build process

Status:	Closed	Priority:	Normal
Author:	bigb	Category:	Packages: Core
Created:	03/03/2010	Assignee:	jams
Updated:	03/27/2010	Due date:	
Description:	The build process should use 'svn export' instead of 'svn co' when downloading the source code. The result is that the user will end up with '.svn' directories on their system. Most of the time this is a none issue, but is evident in mythweb (no compile step).

- *Target version set to 6.03.00*

- *Estimated time set to 2.00*

- *Category set to Packages: Core*

Sometimes using co is better because of the time and bandwidth saved.

Currently working on the mythtv builds to remove all cp and replace them with excluding rsync
