

## LinHES - Bug # 638: mythweb cannot set a password any longer under R6.02

<b>Status:</b>	No user feedback	<b>Priority:</b>	Normal
<b>Author:</b>	graysky	<b>Category:</b>	
<b>Created:</b>	03/07/2010	<b>Assignee:</b>	jams
<b>Updated:</b>	03/26/2010	<b>Due date:</b>	
<b>Description:</b>	If I attempt to assign a password to my mythweb under the service menu of R6.02 nothing happens, i.e. the mythweb is still unpassword protected.  If I run mythfrontend from an xterm and record the output, I get the following  <code> mkdir: cannot create directory `/usr/MythVantage/templates/settings/syssettings': Permission denied /usr/MythVantage/bin/restore_default_settings.sh: line 228: cd: /usr/MythVantage/templates/settings/syssettings: No such file or directory /usr/MythVantage/bin/restore_default_settings.sh: line 237: /usr/MythVantage/templates/settings/syssettings/settings.txt: No such file or directory /usr/MythVantage/bin/restore_default_settings.sh: line 241: /usr/MythVantage/templates/settings/syssettings/keybindings.txt: No such file or directory QSqlDatabasePrivate::removeDatabase: connection 'DBManager0' is still in use, all queries will cease to work. </code>		

### History

I can't replicate this.

Do you have a /usr/MythVantage/templates/settings/syssettings dir ? if not what is the longest dir path you have leading up to it?

**03/20/2010 09:00 pm - jams**

Make sure your using the latest linhes-system and mythinstall and system-templates

I can't answer your question, jams. I have since rolled back to R6.01. Probably safe to close.
