

## LinHES - Bug # 642: Automatic configuration of HDHR faulty

<b>Status:</b>	Closed	<b>Priority:</b>	Normal
<b>Author:</b>	girkers	<b>Category:</b>	
<b>Created:</b>	03/11/2010	<b>Assignee:</b>	
<b>Updated:</b>	08/01/2011	<b>Due date:</b>	01/10/2011
<b>Description:</b>	It was great that the installation automatically detected my Dvico Dual Digital 4 Rev 2 (installed it twice as it is a dual tuner). It did add one tuner for my HDHomeRun however the settings were not right. It had the right serial for it, but there was no IP address for it. If I deleted it and added it back in, it detected it fine.		

### History

**04/06/2010 12:44 pm - jams**

- Due date set to 08/08/2010

- Target version set to 7.1

**08/01/2011 08:44 am - jams**

- Status changed from New to Closed

tweaker has been removed, so no autodetection & adding of cards will occur
