LinHES - Bug # 754: rebuild packages with elfutils

Status:	Closed	**Priority:**	Low
Author:	chael	**Category:**	Packages: Extra
Created:	01/30/2011	**Assignee:**	mihanson
Updated:	02/17/2011	**Due date:**	02/01/2011
Description:	The elfutils package has replaced the libelf package. Some packages currently in the repo (screen, in particular) were built against the old version (/usr/lib/libelf.so.0) and broke when I was forced to install elfutils as part of installing GCC to build makemkv for Blu-Ray support. Many people will want to build makemkv, so updating to elfutils would be wise. Pacman reports that the packages conflict, so I removed libelf and installed elfutils. Then screen broke. I am using this temporary workaround: @# cd /usr/lib && ln -s libelf.so.1 libelf.so.0@
