Associated revisions

08/02/2011 04:45 pm - brfransen

freetype2: Bump to latest. Replaces freetype2-static. Ref #774

08/02/2011 04:47 pm - brfransen

freetype2-static: Remove replaced by freetype2. Ref #774

History

07/31/2011 12:40 pm - jams

- Estimated time set to 4.00

- % Done changed from 0 to 80

The ones listed above are resolved.

aufs2 will need to be uninstalled manually with pacman -R aufs2

There are still a few others that i'm working on.

08/01/2011 09:03 am - jams

- Target version set to 7.1

08/02/2011 03:11 am - martin1802

Remove aufs2 manually and trying again ... but some packages are missing ... next try end of the week :-)

[root@wohnzimmer2 ~]# pacman -Suv

They are all there. You need to refresh your package list. Do pacman -Syu not -Suv

08/03/2011 04:22 pm - mihanson

If we compiled lirc with epoch=1 the lirc upgrade issue would go away.

08/05/2011 07:42 am - martin1802

Hi ... dammed not seen the wrong options in pacman ... did it right now ... pacman was upgrades first, had to change the pacman.conf setting manually. What about the arch repos for testing? At the moment I only activate linhes testing repos for now. Right?

Second step now upgrading done ... many things to upgrade ... sorry for long copies included. Next time I better add in attached file.

Thanks

Martin

(35/122) upgrading libxcomposite [#####] 100%
(36/122) installing libcups [#####] 100%

Optional dependencies for libcups

avahi: for the "dnssd" CUPS backend

(37/122) upgrading gtk2 [#####] 100%
(38/122) installing util-linux [#####] 100%

Optional dependencies for util-linux

perl: for chkdupexe support

(39/122) upgrading module-init-tools [#####] 100%
(40/122) upgrading udev [#####] 100%

ATTENTION UDEV:

Kernel 2.6.32 or newer is now required.

OSS emulation modules are not loaded by default, add to rc.conf if needed.

Arch specific cd symlinks are now no longer created.

cd and net persistent rules will no longer be autogenerated,

see <<https://wiki.archlinux.org/index.php/Udev>> for details.

Errors are now logged (possibly to the console) by default.

ATTENTION UDEV:

Arch's custom blacklisting logic has been removed. MOD_AUTOLOAD and

blacklisting in MODULES no longer works.

See 'man modprobe.conf' for a replacement to blacklisting.

To disable a module mod1 on the kernel command line, use

mod1.disable=1

or

modprobe.blacklist=mod1

--

The following modules are no longer unconditionally loaded:

pcspkr irtty-sir analog lp ppdev ide-generic

Add them to MODULES in rc.conf if you need them.

(41/122) upgrading perl [#####] 100%

- The directories /usr/lib/perl5/current, /usr/lib/perl5/site_perl/current,
/usr/lib/perl5/site_perl/5.10.1, and /usr/share/perl5/site_perl/5.10.1
will be removed from @INC in a future release.

- The directory /usr/bin/perlbin/site will not be added to \$PATH in a
future release.

(42/122) upgrading iproute2 [#####] 100%

New optional dependencies for iproute2

linux-atm: ATM support

(43/122) upgrading initscripts [#####] 100%

warning: /etc/rc.conf installed as /etc/rc.conf.pacnew

Blacklisting of modules is no longer supported in rc.conf,

please add blacklist entries to /etc/modprobe.d/ instead.

New optional dependencies for initscripts

net-tools: legacy network support
