

LinHES - Support # 795: Repos change for R6 ...

| | | | |
|-----------------|------------|------------------|--------|
| Status: | Closed | Priority: | Normal |
| Author: | martin1802 | Category: | |
| Created: | 11/11/2011 | Assignee: | |
| Updated: | 11/14/2011 | Due date: | |

Description: my actual running system should stay at R6 for a while ... changing the repos for it to R6 core/extra ... gave me some warnings and some deps problems ...

the machine is at R6 core/extra on stable branch until I change it to "old" R6 repos ...

Thanks for your great work on LinHES R7 :-)

History

11/11/2011 09:01 am - brfransen

The first few lines say core and extra are up to date. Check your `/etc/pacman.conf` again and make sure that all non-R6 repo are commented out. My guess is that there lines pointing to either the current stable or testing repos that are not commented in addition to the R6 repos.

11/11/2011 09:08 am - martin1802

Hi ...

thanks for quick response :-)

no other repos are activ in `pacman.conf` ... sync updates repos info in my first try ... sorry did not capture it before now repos info is up to date ... no additional arch repos activ

11/11/2011 09:21 am - brfransen

Please post your `/etc/pacman.conf`.

11/11/2011 09:37 am - martin1802

- File `pacman.conf` added

...

11/11/2011 09:58 am - brfransen

Ok, I think you must have sync'ed with the stable repo after R7 packages were pushed but before you changed your `pacman.conf` to point to the old R6 repos. Try `pacman -Syy` with your `pacman.conf` pointing to the R6 repos and then `pacman -Syu`.

11/14/2011 07:30 am - martin1802

[Closed] Works fine and my system is back (up to date) again ...
