

LinHES - Bug # 808: iguanair/Lirc no longer working....

Status:	Closed	Priority:	Normal
Author:	kc8vfa	Category:	Other
Created:	12/26/2011	Assignee:	jams
Updated:	01/04/2012	Due date:	
Description:	Short and skinny of the issue.... On upgrade or fresh install LH 7.1 sees the IguanaIR pauses and gives some errors as it retrys during the boot process.... Ive looked for errors in the logs but have not found any referencing the IguanaIR. just in case you want to read the hardware issues and when I first found it here is the forum link: http://knoppmyth.net/phpBB2/viewtopic.php?t=22311&start=0&postdays=0&postorder=asc&highlight=iguanair&sid=ab11408d0b2a2a2fe21b74b56d8efc7c

- Status changed from Accepted to Closed

- % Done changed from 0 to 100

This should be fixed in lirc-utils-0.9.0-9

The iguanair package was not installed when the lirc package was built. The pkgbuild has been updated to stop this from happening in the future.
