LinHES - Feature # 811: Use avahi for DNS

Status:	Closed	**Priority:**	Normal
Author:	jams	**Category:**	Other
Created:	01/27/2012	**Assignee:**	
Updated:	04/24/2012	**Due date:**	
Description:	avahi is already installed, we should use it for DNS. This should help cut back on systems where the DNS is not up to spec.		

History

04/24/2012 09:16 am - jams

Tested with both dhcp and static ip address.

Hostnames are now advertised with as $hostname.local

04/24/2012 09:16 am - jams

- Status changed from New to Closed
