<b>Description:</b>	Can we get PulseAudio as an option for sound? The package is not included in the LinHes repositories. I'm trying to do some video screen captures using ffmpeg and there is a known "feature" with ffmpeg and alsa in that it will only capture the microphone and not the system audio. The ffmpeg forums recommend using PulseAudio instead of (in addition to) Alsa.

Have you tried Open Sound System? You can active it by using Service Menu > LinHES Configuration > Audio Settings  
Our thought has been, the complexity of add PulseAudio doesn't bring any benefits.
