

LinHES - Bug # 832: upgrade_linhes.sh does not work from console

| | | | |
|---------------------|--|------------------|----------------------|
| Status: | Closed | Priority: | Urgent |
| Author: | mihanson | Category: | Installation/Upgrade |
| Created: | 06/16/2012 | Assignee: | cecil |
| Updated: | 07/20/2012 | Due date: | |
| Description: | Running upgrade_linhes.sh from console does not work. When run as root on VT3, I get dropped back to VT2 (splash screen) and nothing happens. I logged in via ssh and was able to run upgrade_linhes.sh via ssh. | | |

LinHES-config: add plymouth_config.py to the package

This program is called by xconfig.sh to determine which video driver to include in the initrd for KMS to work.

For this version if X uses an intel driver then i915 is included in the initrd, any things else defaults to vesa.

if plymouth_config detects that no changes are needed, it will quit without running mkinitcpio.
