Updated:	09/23/2012	**Due date:**	

Description:	Following this thread here, I was able to get the Haupauge Nova-HD-S2 card to work with LinHES. All that is necessary to do this is add the correct firmware to the /lib/firmware folder (thanks brfransen for the where!)
	I used the most recent version of the 1.26.90.0 firmware from www.wintvcd.co.uk as described in the post over at LinuxTV.org. [[http://www.linuxtv.org/wiki/index.php/Hauppauge_WinTV-HVR-4000]]
	@cd /tmp
	wget http://www.wintvcd.co.uk/drivers/88x_2_126_28225_WHQL.zip
	Unzip 88x_2_126_28225_WHQL.zip
	sudo dd if=hcw88bda.sys of=/lib/firmware/dvb-fe-cx24116.fw bs=1 skip=105768 count=32290 @
	I also used their command for the symink, but I don;t think it necessary.
	After rebooting my LinHES box, I was able to scan for channels successfully.
