<b>Description:</b>	Found this the other day. <a href="https://bbs.archlinux.org/viewtopic.php?id=153234">https://bbs.archlinux.org/viewtopic.php?id=153234</a> Patched version of wine allows for silverlight and netflix. I started to try building it but ran into dependencies that conflicted with LinHES packages.

netflix-desktop is in the R7 testing repo. The only issue is, the package doesn't place itself in the menu. This will be resolved fully in R8.
