Do you know what pkg included the firmware in R7?

04/14/2013 01:03 pm - tophee

I don't think it was available in R7.

I had to install the firmware manually. I did try to open a ticket to get it added after I'd got the card working, but I only put a link to instructions. This time I uploaded the file!

05/29/2013 02:22 pm - jams

- Assignee set to jams

- Category set to Packages: Core

- Target version set to 8.0

The R8 package dvb-firmware has the firmware included. Please verify it's the correct file.

I have just come back to this after a while of getting on with life... The file I uploaded was not originally named this, I had to modify the name to be what was expected, though it didn't overwrite anything on my box. It just wasn't there. The copy I uploaded is the one I needed for functionality of my cards.

07/17/2013 06:57 am - brfransen

The file you uploaded is named dvb-fe-cx24116.fw and as jams said is included in dvb-firmware.

```
@[mythtv@mythtv ~]$ sudo pacman -Qo /lib/firmware/dvb-fe-cx24116.fw
```

/lib/firmware/dvb-fe-cx24116.fw is owned by dvb-firmware 1-19@
