

LinHES - Bug # 919: Create USB image of R8 using dd

Status:	Works for me	Priority:	Low
Author:	tscholl	Category:	Installation/Upgrade
Created:	05/03/2013	Assignee:	jams
Updated:	08/26/2013	Due date:	
Description:	Tried to create a usb image of R8.iso dd if=/path/to/LinHES.iso of=/dev/{usb_id} to transfer the R8 iso image to a usb drive. dd completes without errors. lpl of USB drive returns "isolinunx.bin missing or corrupt"

- Assignee set to jams

- Category set to Installation/Upgrade

- Status changed from New to Works for me

- Target version set to 8.1

Tried 5 different brand new usb sticks. Only one gave me trouble and that was cleared up after running the dd command a second time

```
dd if=my.iso of=/dev/sde bs=8M
```

```
sync
```

Try running sync before pulling the drive and/or adding bs=8M to the dd command.
