<b>Description:</b>	<p>Had some extra time to work on installing Firefox 21 on an R8.02 Test Box. Installation information of Firefox 21 on Arch is very limited on the Web today. Moreover, no nice PKGBUILD like google-chrome's. Also flash is not embedded as in google-chrome.</p> <p>Packages Needed <a href="https://www.archlinux.org/packages/extra/x86_64/firefox/download/">https://www.archlinux.org/packages/extra/x86_64/firefox/download/</a> <a href="https://www.archlinux.org/packages/extra/x86_64/nspr/download/">https://www.archlinux.org/packages/extra/x86_64/nspr/download/</a> <a href="https://www.archlinux.org/packages/extra/x86_64/nss/">https://www.archlinux.org/packages/extra/x86_64/nss/</a> <a href="https://www.archlinux.org/packages/extra/x86_64/startup-notification/download/">https://www.archlinux.org/packages/extra/x86_64/startup-notification/download/</a> <a href="https://www.archlinux.org/packages/extra/x86_64/xulrunner/">https://www.archlinux.org/packages/extra/x86_64/xulrunner/</a> <a href="https://www.archlinux.org/packages/extra/x86_64/sqlite/download/">https://www.archlinux.org/packages/extra/x86_64/sqlite/download/</a> <a href="https://www.archlinux.org/packages/extra/x86_64/libpng/download/">https://www.archlinux.org/packages/extra/x86_64/libpng/download/</a></p> <p>Installation pacman -U nspr-4.9.6-1-x86_64.pkg.tar.xz pacman -U nss-3.14.3-3-x86_64.pkg.tar.xz pacman -U startup-notification-0.12-3-x86_64.pkg.tar.xz pacman -U xulrunner-21.0-1-x86_64.pkg.tar.gz</p> <p>Next tar xvf libpng-1.6.2-3-x86_64.pkg.tar.gz cd usr cd lib cp libpng16*.* /usr/lib/</p> <p>Then tar xvf sqlite-3.7.17-1-x86_64.pkg.tar.xz cd usr cd lib cp libsql*.* /usr/lib/</p> <p>And don't forget ls -s /usr/lib /usr/lib/firefox</p> <p>and pacman -U firefox-21.0-1-x86_64.pkg.tar.gz</p> <p>You can now launch Firefox 21</p> <p>Hope this will encourage more users to upgrade to R8.02.</p>

- Status changed from New to Closed

Chrome/chromium is the only Linux browser that has support for the latest version of Flash. Due to limited LinHES dev resources Chrome is the browser that will be packaged. Please feel free to create a Wiki entry at [\[\[Misc\\_tips\\_and\\_other\\_neat\\_things\]\]](#) with these instructions for those that want to use Firefox on LinHES.
