Description:	Had some extra time to work on installing Firefox 21 on an R8.02 Test Box.	
	Installation information of Firefox 21 on Arch is very limited on the Web today.	
	Moreover, no nice PKGBUILD like google-chrome's. Also flash is not embedded as in google-chrome.	
	Packages Needed	
	https://www.archlinux.org/packages/extra/x86_64/firefox/download/	
	https://www.archlinux.org/packages/extra/x86_64/nspr/download/	
	https://www.archlinux.org/packages/extra/x86_64/nss/	
	https://www.archlinux.org/packages/extra/x86_64/startup-notification/download/	
	https://www.archlinux.org/packages/extra/x86_64/xulrunner/	
	https://www.archlinux.org/packages/extra/x86_64/sqlite/download/	
	https://www.archlinux.org/packages/extra/x86_64/libpng/download/	
	Installation	
	pacman -U nspr-4.9.6-1-x86_64.pkg.tar.xz	
	pacman -U nss-3.14.3-3-x86_64.pkg.tar.xz	
	pacman -U startup-notification-0.12-3-x86_64.pkg.tar.xz	
	pacman -U xulrunner-21.0-1-x86_64.pkg.tar.gz	
	Next	
	tar xvf libpng-1.6.2-3-x86_64.pkg.tar.gz	
	cd usr	
	cd lib	
	cp libpng16*.* /usr/lib/	
	Then	
	tar xvf sqlite-3.7.17-1-x86_64.pkg.tar.xz	
	cd usr	
	cd lib	
	cp libsql*.* /usr/lib/	
	And don't forget	
	ls -s /usr/lib /usr/lib/firefox	
	and	
	pacman -U firefox-21.0-1-x86_64.pkg.tar.gz	
	You can now launch Firefox 21

Hope this will encourage more users to upgrade to R8.02.

Chrome/chromium is the only Linux browser that has support for the latest version of Flash. Due to limited LinHES dev resources Chrome is the browser that will be packaged. Please feel free to create a Wiki entry at [[Misc_tips_and_other_neat_things]] with these instructions for those that want to use Firefox on LinHES.
