

LinHES - Feature # 943: warn user when system_backup hasn't been run for a while

| | | | |
|---------------------|--|------------------|----------------|
| Status: | Closed | Priority: | Normal |
| Author: | brfransen | Category: | Packages: Core |
| Created: | 11/21/2013 | Assignee: | |
| Updated: | 12/18/2013 | Due date: | |
| Description: | warning on-screen as well as myth_status.py. I am thinking the threshold should be 3-5 days before a warning is triggered. | | |

xymon-server: hook up xymon alerts to the osd.

System will push out alerts via func to all hosts for any red conditions excluding the ping test.

Test must be red for 4hours with repeat notifications every 12 hours

xymon-server: ignore /cdrom /mnt /media for disk checks.

Modify hbnodes.py so that it adds hosts to analysis.cfg. This is needed to define the proper checks per host type.

LinHES-system: myth_status.py Add in the ability to pick up system alerts which are generated by xymon.

The program will look for files placed in /home/xymon/var/login_notify and parse as needed.

Files are generated by xymon by the file login_notify.py which is called via alerts.cfg

Also myth_status got a bit of rearranging. Now the tuner & recording status info is in a class.

LinHES-system: myth_status.py: add support for color levels. refs #943 #945

remove diskpace.cron as xymon now monitors and notifies disk levels
