

LinHES - Feature # 994: Support for the Streamzap remote in kodi.

Status:	Closed	Priority:	Normal
Author:	mattbatt	Category:	
Created:	04/16/2015	Assignee:	
Updated:	04/24/2015	Due date:	
Description:	Refer to thread http://forums.linhes.org/viewtopic.php?f=21&t=24165&start=30#p139834 The default lirc .conf file for streamzap includes "<<", ">>", " <<", and ">> " for rewind, fast forward, previous, and next. when you translate that to Kodi in the Lircmap.xml file > and < are illegal characters in XML. I changed them to rewind, forward, previous, and next in /usr/MythVantage/templates/remotes/favorites/streamzap/lircd.conf.streamzap and /usr/MythVantage/templates/remotes/favorites/streamzap/lircrc. The files are here https://www.dropbox.com/sh/2jqbrf6ha1vjd6j/AACTs7Z90o4mh_alp3hsJezca?dl=0 The default Lircmap.xml file at /usr/share/kodi/system/Lircmap.xml doesn't have Streamzap listed so I created one, it is also in the dropbox folder.

If you look at the official LIRC website they have a bunch of conf files for remotes and they appear to have deprecated the chevrons already for streamzap. <http://sourceforge.net/p/lirc-remotes/code/ci/master/tree/remotes/streamzap/streamzap.lircd.conf>

And it appears that they have standardized their button names for the common buttons. <http://lirc-remotes.sourceforge.net/remotes-table.html>

Thanks, but you broke Kodi I did an upgrade from the menu to test this and the Lircmap.xml file that got dropped /MythVantage/remotes is all sorts of wrong Here is the file that was put there. <https://www.dropbox.com/s/nbhfgt60hmmg05q/Lircmap.xml?dl=0>

I opened it in Chrome and it looks like the Linhes.org page.

We are so close (by we I mean you)

Looks like the original file in Dropbox is funky: <https://www.dropbox.com/sh/2jqbrf6ha1vjd6j/AAAJ4fU0RkrOspzRkYaiapdMa/Lircmap.xml?dl=0> The one attached to the forum is correct I think.
